Execution of Deluge Functions in Zoho Creator

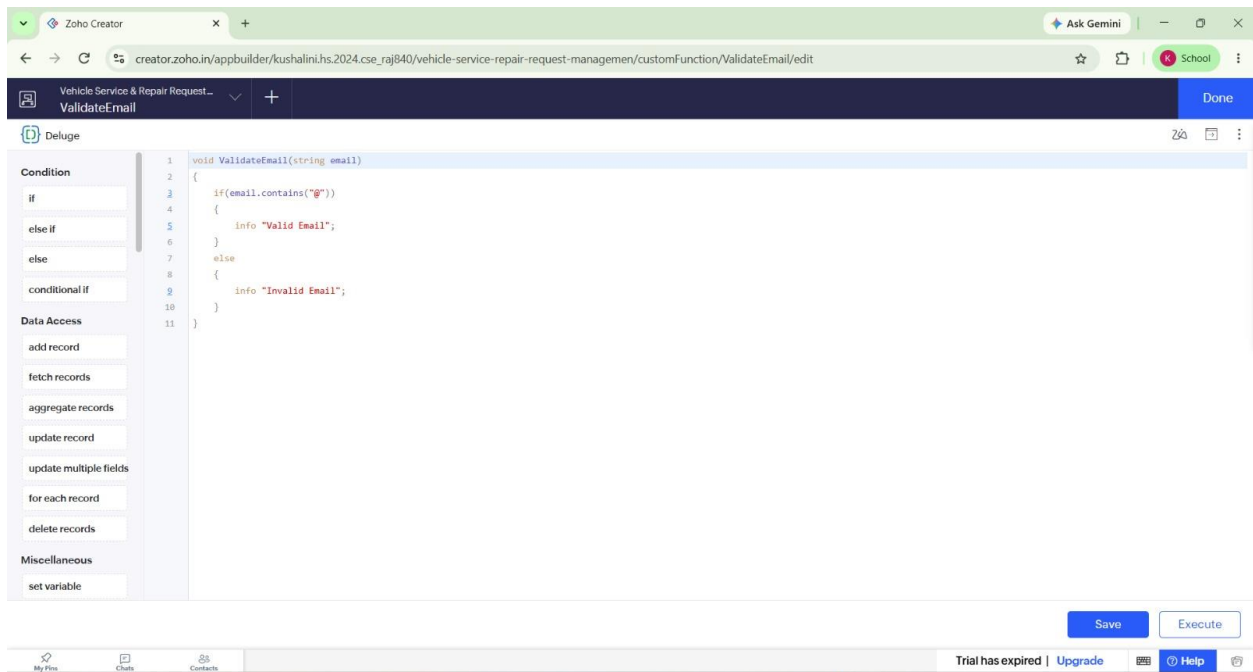

Aim

To create and execute Deluge functions in Zoho Creator for performing various operations in the Vehicle Service application and to verify their outputs.

Procedure

1. Open the Vehicle Service application in Zoho Creator.
2. Navigate to Workflows → Functions.
3. Click New Function.
4. Enter the required Function Name.
5. Select the appropriate Return Type.
6. Add the required Arguments with their data types.
7. Click Create to open the Deluge editor.
8. Enter the required Deluge script.
9. Click Save to save the function.
10. Click Execute and provide the required input values.
11. Click Submit/Execute and observe the output.
12. Verify that the obtained output is correct.

Output

Zoho Creator | Ask Gemini | School

creator.zoho.in/appbuilder/kushalini.hs.2024.cse_raj840/vehicle-service-repair-request-management/customfunction/ValidateEmail/edit

Vehicle Service & Repair Request...
ValidateEmail

Deluge

Condition

```
1 void ValidateEmail(string email)
2 {
3   if(email.contains("@"))
4   {
5     info "Valid Email";
6   }
7   else
8   {
9     info "Invalid Email";
10  }
11 }
```

Data Access

- add record
- fetch records
- aggregate records
- update record
- update multiple fields
- for each record
- delete records
- Miscellaneous
- set variable

Execute

Result:

Executed Successfully

Log messages:

Valid Email
